**Dottò, ma quando scoppia il Vesuvio?
il Nuovo Grand Tour**

Enzo De Novellis, Lello Somma

The show "Dottò, ma quando scoppia il Vesuvio - il Nuovo Grand Tour" stages all the ingredients that the Vesuvius machine has been able to produce and preserve over time until today. The new Grand Tour represents the new tourist embrace that the territory offers to visitors, who today no longer present themselves in the guise of curious wayfarers, but with the right mixture of ancient and modern, lost and found and why not, sacred and profane, as history, identity and tradition impose.

When it comes to disseminating issues related to natural hazards, interdisciplinarity is confirmed to be the most efficient analysis approach; if the protagonist is Vesuvius, precisely because of its 2000 years of history, and therefore because of the exceptional quantity and quality of information available, the presence within an art and science festival becomes completely natural.

Auditorium Novecento
Via Enrico De Marinis 4, Napoli
